- Python

Experience

2013–Present **Web Developer – Hipsters of the Coast – New York, NY**
- Diagnose, develop, and deploy bug-fixes and application updates.
- Develop and execute long-term projects including site redesigns and the addition of major features, such as a new comment system and link previews.

2010–Present **Freelance Web Developer – Seattle, WA/New York, NY**
- Design, build, and operate personal and business websites, as well as fully-functional web apps
- Work with a broad range of technologies, including simple HTML/CSS, Wordpress, Bootstrap, Ruby on Rails, and JavaScript.

2014 **Web Development Immersive – General Assembly – New York, NY**
- Developed with git, Ruby, Rails, Sinatra, PostgreSQL, JavaScript, JQuery, Underscore, Backbone, and D3.
- Tested extensively with RSpec, Capybara, and Jasmine. Utilized multiple testing paradigms, including test-driven and behavior-driven development, as well as acceptance testing.
- Worked collaboratively to plan, develop, and deploy functional web applications.

2012–2014 **Field Operations Coordinator – Columbia University – New York, NY**
- Provided a combination of tier one and tier two technical support to library staff.
- Managed between two and four student workers. Participated in the interview process for new hires.

2007–2011 **Computer Technician – Seattle Public Schools – Seattle, WA**
- Tier one hardware support at a Seattle-area elementary school.
